

■ Privacy-First AI Interviewer

Role: Backend Engineer

Date: 2026-08-01

Session ID: 9b5dc12a-8056-4df8-8698-505007926074

Overall Score: **1.0 / 5.0**

Scorecard

Dimension	Score	Justification
Technical Depth	1	No candidate response was provided to evaluate the technical depth of their architectural design.
Communication Clarity	1	Evaluation is impossible as the transcript only contains the interviewer's prompt and no candidate reply.
Confidence Fluency	1	No speaking performance was recorded for the candidate to assess fluency or filler words.
Star Completeness	1	This dimension is reserved for behavioral questions; no such answer was provided in the transcript.
Problem Solving	1	The candidate did not provide a solution or reasoning process to evaluate their problem-solving skills.

Full Transcript

Interviewer: Imagine you are tasked with designing a new, highly scalable platform that processes millions of real-time user events (like clicks or sensor data) per second. Can you walk me through the key components and architectural decisions you would make to ensure low latency and high durability?

Summary & Next Steps

Evaluation is impossible because the transcript only contains the interviewer's question and no response from the candidate. To proceed with scoring, please provide the full interview interaction including the candidate's detailed answer to the scalability design prompt. Once available, focus on evaluating how well they structure their solution (e.g., Kafka/Kinesis -> Stream Processors -> Databases).
